

SYSERA

Solutions by Design

Business software solutions from SYSERA
help companies like yours achieve great results!

The SYSERA Difference

Since 1993, SYSERA has been providing award-winning business software solutions to small and medium sized businesses in a variety of industries. Because we deploy software designed to integrate your entire business process, we have become one of the most sought after Sage Software business partners in California. By listening to your needs, we consistently deliver results that exceed your expectations in functionality, efficiency and savings. Our deep knowledge of many industries, combined with highly responsive support levels, will help you meet and surpass your business goals in ways no other provider can deliver.

Challenges to Overcome

At SYSERA, we know the many challenges facing your business. Our business software solutions can help you achieve great results by finding ways to help you work smarter, faster and more accurately than ever before. Regardless of whether your need is in accounting, manufacturing operations, or warehouse distribution, our seasoned consultants will make sure your business is operating at peak efficiency in any industry.

A Path to Success

As a Sage Software Select Business Partner, we find creative ways to research and solve problems impacting today's businesses. Our ERP solutions are already so flexible out-of-the-box that you realize a strong return on investment almost immediately. But we won't stop there. Only after extensive design consultations with you do we begin the actual deployment of a new software solution. Whether you are a small business with big dreams or a large corporation with an impressive IT infrastructure, you can be assured our consultants will find ways to add value to your company.

“SYSERA's consultants are awesome! I rely upon Sage Accpac from the time the phone rings to when a customer's order is shipped. With as many hats as I wear these days, that's priceless.

– Donna Brewer, Operations Manager
Western Rubber & Supply, Livermore, CA

Total Investment Protection

A business solution is only as good as its return on investment. SYSERA works to ensure your software will meet and exceed your important business needs. Why? Because our experienced consultants will make industry best-practices, enhanced transaction throughput, improved data accuracy and system flexibility the hallmarks of your new business management system. Maximizing the speed of deployment and performing exhaustive training minimizes costs while ensuring there is complete adoption of the new solution by its users. If we haven't resolved your important business requirements and made you the most efficient business in your industry, we will work with you until we have!

It's About the Experience

Our consultants speak your language and care about your experience with Sage Software. Our integrity and commitment to your satisfaction shows in everything we do. We make the transition to your new software solution as smooth as possible and stay with you through the first monthly accounting close. Your usage questions and trouble tickets are our highest priority. By partnering with you, we will continue to evaluate and recommend productivity enhancing solutions that bring definable gains to your bottom line. It's all because we truly care about your success and positive experience with our Sage Software products.

SYSERA

From a time-saving e-commerce website to an integrated shipping solution, SYSERA and Sage Accpac have helped us become one of the most efficiently run eyewear companies in the world.

– John Barrett, COO, Wiley X Eyewear, Livermore, CA

Roadmap for Success

You have plans for your company or you wouldn't be in business. Success is the ultimate goal but there are many wrong turns that can take you off course. Because we share your dreams, we will tirelessly work with you to build the right roadmap for success. Together, we will make sure you have the right industry solution and dedicated technical support needed to compete and win in today's demanding economy.

Our business management solutions are truly easy to use and adapt to the way you do business, not the other way around! We can address a broad range of transactional requirements affecting your business including:

- Accounting & Financial
- Customer Relationship Management
- E-Commerce
- Human Resources Integration
- Manufacturing
- Global Logistics Management
- Data Warehouse Reporting
- Services Management

With web-deployment, database neutrality and operating system flexibility, we give you ultimate freedom to choose how and where to use your custom designed solution.

Solutions for your Industry

To be the best in your industry, you need an edge, a key advantage over the competition that paves the way for growth and profitability.

At SYSERA, we sharpen that edge with the finest business management systems from Sage Software. Our consultants perform more than just a simple software deployment; they seek ways to build a healthy return on investment into every key business process.

As a Sage Select Business Partner, we have access to hundreds of industry specific solutions that deliver extensive functionality. We have designed solutions for a wide variety of industries including:

- Manufacturing
- Wholesale / Distribution
- Hotel & Entertainment
- Non-Profit
- Construction
- Publishing
- Medical
- Government Contractors

Even though we have a very unique business, SYSERA has customized Sage Accpac to how we do business. Their consultants have automated our processes and enabled us to increase productivity while decreasing labor costs.

– Tammy Sanders, Operations Manager, Photoflex, Inc., Watsonville, CA
